

Our mission is to conserve
the lands and waters on
which all life depends.

The Nature
Conservancy

Healthy Chesapeake Bay

The Nature
Conservancy

Healthy Forests

Green Cities

Resilient Coasts

Regenerative Agriculture

Agricultural Lands Provide Food, Clean Water, and Resilience to Climate Change

50% of cropland (about 2 million acres) adopt advanced
nutrient management and soil health practices

235,000 acres of wetland and floodplain restoration and
enhancement

Finding collaborative
solutions to barriers

Securing technical assistance
and other resources for
implementation

Working with
Agribusinesses/ 4R
Alliance

14,000 acres
adopted new
practices

Expanding partnerships
to fill TA gaps and
provide flexibility

3,200 acres
floodplains
and wetlands
restored

Supporting companies in
supply chain to set and
meet sustainability goals

Dairy and
Beef
